

CRT Test Importing

In order to import CRT Tests the following conditions must be met:

1. The SQL Server must have a database set up that the CRT tests will be imported into viz. SISTestdatadb.
2. There must be an application variable set up in the Global.asa file on the Web server as follows: Application("test_database") = "SISTestdatadb"
3. The latest CRTImport.dll must be registered on the Web (preferably by using Component Services found in the Control Panel under administrative tools).

The Import process is as follows:

1. Unzip the alternate format CRT extract record and rename the CRT files with a *.txt extension.
2. A Master Test Record needs to be set up for each CRT Test that will be imported. Don't worry about setting up the subtests—the import will do this for you.

Sub Tests - ADD

Sort Ord	SubTest	Description	Score Type	Passing Score	Max Score	Hide	Add
1	<input type="text"/>	<input type="text"/>	<input type="text" value="Raw Score"/>	<input type="text" value="0"/>	<input type="text" value="0"/>	<input type="checkbox"/>	<input type="checkbox"/>
2	<input type="text"/>	<input type="text"/>	<input type="text" value="Raw Score"/>	<input type="text" value="0"/>	<input type="text" value="0"/>	<input type="checkbox"/>	<input type="checkbox"/>

3. Create a Test Instance for the CRT Test that will be imported.
4. After saving the Test Instance Record, a button will become available that is labeled “CRT Import”. Press this button and verify that you want to do a CRT import when asked.
